2. Existing System

- All Work are done Manually.
- In Manual Booking System Customer has to go to the Travelling office.
- Ask Inquiry for Travelling then Book ticket Finally Pay Payment & Collect Receipt.
- Difficult To Maintain the Customer Details of Package and Payment Receipt in Register.
- They Register Tour Package in the notebook.
- Add advertisement in Local newspaper or Local Market.
- Use Travelling Facility For the Limited Area or Person.
3. Need for New System

- To Create Web Based Application For our Organization.
- To Provide Search Facility For Customer.
- To Generate Different Types of Reports.
- To Provide the online Ticket Booking and online Payment Facility For Customer.
- To Provide package Details.
- Customer Can Cancel the Booking then Return 15% Less Deduct From the Amount.
- Services provided by Tour and travels System.
  - VIEW PACKAGE
  - SEARCH PACKAGE
  - BOOKING
  - CANCLE BOOKING
  - ONLINE PAYMENT

4. Function Specification

- Modules that will be there in the projects are:

  - **Customer:**
    - Registration(Login)
    - View package
    - Search package
    - Booking
    - Give Payment
    - booking Cancellation
    - Give Feedback

  - **Admin:**
    - registration(Login)
    - Manage User
    - Manage Tour-package
    - Manage Ticket Booking
    - Manage Payment
    - View Cancellation
    - View feedback

  - **Visitor:**
    - View site
    - Give feedback

  - **TRAVELER:**
    - Registration
    - Login
    - manage tour
    - Manage tour package cost
    - Manage Bus(travels)
User Specification

Admin:
- admin can manage the user and receive package from traveler & package management.

Traveler:
- Traveler create the package and give to admin.

Customer:
- customer can view package and booking.

Visitor:
- Visitor view side and give feedback.
5. Hardware & Software Specification

- Hardware Specification :
  - Server Side:
    - Processor: 2.0 GHZ
    - RAM: 2 GB
    - Hard Disk: 30 GB free space

14. POST IMPLEMENTATION REVIEW

• After the system implemented and conversion is completed, a review of system is usually conducted by users and analyst this is called post implementation review.

• The most fundamental concern post implementation review is determining the system has met its objective, that is analyst want to know if the performance level of the system has improved and if the system is producing the result intended.

• If neither is happening, one may question whether the system can be considered successful.

• By using current system, all the requirements of all users are fulfilled.
15. FUTURE ENHANCEMENT

- In future we will give facility of online donation.
- We will include more functionality as per user requirement.
- Not a single website is ever consider as complete forever firstly because there is always something new requirement also are growing day by day.
- We want to improved our home page, as it is the main thing which attracts all users.
